International Review of General Linguistics

Special Issue

Prosody at the Grammatical Crossroads — Japanese and Beyond
Guest Edited by Yoshihisa Kitagawa & Satoshi Tomioka

Over 2,500 journals are included in ScienceDirect: www.sciencedirect.com

0024-3841(201301)124:1-I

The Journal is devoted to the problems of general linguistics. Its aim is to present work of current interest in all areas of linguistics. Contributions are required to contain such general theoretical implications as to **be of interest to any linguist, whatever their own specialisation.**

No particular linguistic theories or scientific trends are favoured: scientific quality and scholarly standing are the only criteria applied in the selection of papers accepted for publication.

Lingua publishes papers of any length, if justified, as well as review articles surveying developments in the various fields of linguistics, and occasional discussions. A considerable number of pages in each issue are devoted to critical book reviews. *Lingua* also publishes themed special issues and has the facility to publish supplementary material online, for example, audio and video files.

Journal Editors' comments

"...my current view is that the author should take as many steps as possible to make their article right before it is submitted..."

"Poor English is a worrying problem, especially when the scientific work is novel and deserves publication."

"... authors have to be responsible for ensuring at least reasonable language."
